

COUNTY OF YORK

MEMORANDUM

DATE: June 6, 2001 (BOS Mtg. 6/19/01)

TO: York County Board of Supervisors

FROM: James O. McReynolds, County Administrator

SUBJECT: Engineering Contract for Lodge Road Pump Station

In accordance with the schedule of projects outlined in the Utilities Strategic Capital Plan, Environmental and Development Services (EDS) requested engineering proposals for the design of the Lodge Road Pump Station project. The Lodge Road Pump Station project, referred to as the Route 199 South Economic Development Area project in the Utilities Strategic Capital Plan, is the second priority of the eleven economic development projects. The first ranked economic development project, Cedar Valley Regional Pump Station, is currently in the design phase.

The purpose of the Lodge Road Pump Station project is to intercept flows that are currently going to the Rolling Hills pump station. This will give the Rolling Hills station needed capacity to allow development to proceed along the Route 199 South corridor near Water County USA, Kings Creek Plantation and the Fuel Farm. Please see attached copy of the Route 199 South Economic Development Service Area Boundary Map from the Utilities Strategic Capital Plan.

Seventeen proposals were received and reviewed by a selection committee consisting of engineers from EDS and a purchasing representative from Financial and Management Services. Three firms were short-listed and subsequently interviewed for this project.

Negotiations commenced and were concluded with the engineering firm ranked first by the selection committee, URS Corporation. The negotiated contract price totals \$185,697. The Board of Supervisors has previously appropriated sufficient funds for this project.

I recommend adoption of Resolution R01-126.
